

IOTECH CLUB 25-26

Activity Title	Skill Development Session
Date	7th July 2025
Venue	412 Classroom, SIGCE
Time	11:00 AM–1:00 PM
Purpose	The objective of the session was to guide students on the importance of skill development for long-term success in engineering and to help them align their academic learning with industry needs.
Participants	Students from SE
Highlights	The session, led by speaker Mr. Om Jadhav, an Industry Mentor & Consultant from Odyssey, covered key themes such as the changing tech landscape, essential technical and soft skills, leveraging platforms like GitHub and LinkedIn, and the value of internships and real-world projects. The event saw active student participation, with a Q&A segment that led to an enriching discussion. The atmosphere was interactive, focused, and motivational.

Images

Program Outcomes	Statement
PO2 - 2	Analyze complex engineering problems, requiring students to use first principles of mathematics, science, and engineering to reach substantiated conclusions
PO7 -2	use modern engineering and IT tools to conduct investigations of complex problems, which includes using the design of experiments, analysis of data, and synthesis of information to arrive at valid conclusions

<p>Conclusion</p>	<p>The session was highly impactful and well-received, successfully motivating students to actively build their skills and professional profiles. It also served as an ideal start to the IoTech Club's annual roadmap of student development activities. The IoTech Club aims to host more insightful sessions to continue supporting students in their career journeys.</p>
